stations have
already carried out
accessibility works
since 2009

22 combined
transport terminals

4.9 billion Euro
invested per year to
modernise the network in
France via 1 600 projects

OUR ASSETS TO MEET YOUR OBJECTIVES

Our commercial team is in close contact with the market and is **at your disposal every day** to understand your needs and provide you with a personalised solution to guarantee you the highest possible quality train paths. We guarantee you fair access* to our entire network, in cooperation with neighbouring European networks.

* In accordance with the requirements of the French Transport Code and under ARAFER control.

Within the Network Access activities, SNCF Réseau **Marketing and Commercial Department** provides a National technical and commercial platform (PNTC) composed of account managers and industrial dialogue managers to help you early in the process as well as in your day-to-day work.

Throughout the territory, our **Customer and Service Centres** are your local commercial contacts.

The **Rail Company Service Platform (PSEF)** offers an access to facilities and direct contact to the rail companies and applicant production teams.

PASSENGER RAIL COMPANIES

We help improve your performance and the quality of service you provide to your customers. Our network is adapted to different mobility requirements, with the increasing ability to anticipate and adapt.

FREIGHT RAIL COMPANIES

As your company's partner, we provide access to our network and service facilities, combined with the services which are adapted to your logistical organisation.

COMBINED TRANSPORT OPERATORS AND OTHER APPLICANTS

We help you design high performance transport plans which are adapted to the flows, prices, organisation and demands of your customers.

SEA AND RIVER PORTS

We help you develop your inter-modal flows by building transport plans with you and providing you with train paths and dedicated infrastructures.

INDUSTRIAL COMPANIES

To integrate the rail network effectively into your supply chain and optimise your transport plan, we have a wide capacity and service offer to help you make the most of your private sidings.

TRANSPORT ORGANISING AUTHORITIES

We pay close attention to your local issues and are your daily partner to help you develop rail transport in your region.

OFFERS ADAPTED TO YOUR NEEDS

OUR NETWORK ACCESS OFFERS TAKE ACCOUNT OF YOUR NEEDS ACROSS THE WHOLE PRODUCTION CHAIN

Train paths and operations

- Customer assistance from train path ordering to operation
- Access to the associated information systems

- Specific network usage conditions (special transport, etc.)

Management

- Real time information provision
- Reliability reporting

THE NETWORK STATEMENT

Find the details of these offers in the network statement, which may be consulted and downloaded at www.sncf-reseau.fr
Network access : offers and customers

AN OFFER ACCOMPANIED BY A QUALITY AND PARTNERSHIP-BASED APPROACH

Bilateral conventions with rail companies, applicants (framework agreements and train path quality agreements) and shippers, can be established in the context of partnerships with professional associations.

Exchange with clients and partners in the context of the Network Operations Committee (COOPERE), the permanent discussion body, to draft the network charter. This charter brings together good operational practices for all network users.
