

THE FREIGHT NETWORK ACCESS OFFER

TAILOR-MADE
SOLUTIONS
FOR CARRIERS
AND SHIPPERS

SNCF RÉSEAU YOUR TRANSPORT PARTNER

SNCF Réseau works to develop rail freight by proving a fair, dedicated and transparent offer. In an environment which combines a whole host of actors, regulations and joint operations with other modes, our teams work to direct you effectively.

IN FIGURES

21 freight rail companies

12 applicants requesting train paths

9 large French sea and river ports connected to the national rail network

4.9 billion Euro invested per year to modernise the network in France via 1 600 projects, with an organisation that seeks to minimise impacts on commercial capacity

Over **1 400** private sidings connecting industrial companies to the national rail network and major sea ports

500 freight yards

22 combined transport terminals

Did you know?

SNCF Réseau brings together all stakeholders (rail companies, shippers, regions, ports, etc.) within an approach that seeks to analyse and guarantee the sustainability of the feeder network, through national and regional steering committees.

AN OFFER ADAPTED TO FREIGHT

A TAILOR-MADE AND SCALABLE OFFER

This offer adapts to the needs of different actors (rail companies, shippers, ports, combined transport operators) with the possibility of end to end transport.

An expanded offer, with strong territorial networking:

- 500 freight yards,
- 22 combined transport terminals,
- 36 diesel filling stations,
- around 7 500 km of sidings,
- over 1 400 private sidings connecting industrial companies to the national rail network and major sea ports.

An offer that respects the environment:

- Rail is the most carbon-saving mass transport mode, a major commercial argument.
- A mode which offers guarantees in terms of safety and security, for example for transporting hazardous goods.

A SIMPLE ACCESS OFFER

The Network Access offer is accessible to all actors, in particular candidates who want to order train paths; the commercial teams may be contacted directly to discuss a rail routing solution together.

At all times, our **account managers**, who are present at **national** level (dedicated freight team within the PNTC, the National Technical and Commercial Platform) and at **regional** level (Customer Service Centres), are at your disposal to provide you with personalised assistance.

Since 1st January 2017, a **Combined Transport Operator Service Platform** (PSOTC) is open at the PNTC to take better account of the specific requirements of this activity.

The **Rail Company Service Platform** (PSEF) offers an access to facilities and direct contact with rail company and applicant production teams.

AN OFFER WHICH IS ACCOMPANIED BY A QUALITY AND PARTNERSHIP-BASED APPROACH

Bilateral conventions with rail companies, applicants (framework agreements and train path quality agreements) and shippers, in the context of partnerships with professional associations.

Freight companies, combined transport operators and shippers are also represented in the Network operators' committee (COOPERE). This discussion body seeks to draft the network charter which collects good operational practice for all network users.
